EXPERIENCE

AlphaStream.AI *Sept 2025 – Present*

Member of Technical Staff - 1 ***Sept 2026 – Present***

- Developed and enhanced full-stack applications using **React.js, Next.js, Python, and FastAPI**, implementing end-to-end features across frontend interfaces, backend services, and RESTful APIs.
- Built and maintained **automated and unit test cases using Playwright and Jest** to validate application workflows, improve regression coverage, and ensure reliability of production features.
- Leveraged **Amazon Bedrock with Anthropic LLMs** for intelligent document analysis, processing extracted data points (DPs), identifying dependencies between related DPs, and organizing them into meaningful sections.
- Developed LLM-powered workflows to **generate contextual summaries from extracted document data**, transforming interdependent DPs into structured and human-readable information.

Full Stack Developer Intern ***Sept 2025 – Aug 2026***

- Engineered real-time data dashboards using **React.js, TypeScript, and AG Grid Enterprise**, enabling high-performance rendering of large tabular datasets with dynamic filtering and sorting. Developed and integrated **FastAPI RESTful backend APIs** for data ingestion and dynamic content rendering, reducing latency through query pipeline optimization.
- Implemented **Role-Based Access Control (RBAC)** with environment-based permission scoping, securing multi-tenant feature access across development, staging, and production. Built PDF/HTML annotation and highlighting workflows enabling interactive document review across the frontend stack.
- Contributed to **AI-assisted document intelligence workflows**, supporting annotation, highlighting, and automated content interaction features for large-scale document processing. Collaborated in Agile sprints using Jira and Git, contributing to sprint planning, code reviews, and production feature delivery.

PROJECTS

Mentor Loop – AI-Integrated Mentorship Platform *React.js | TypeScript | Firebase | LLM APIs | Vercel*

- Architected a full-stack mentorship SaaS using React.js, TypeScript, and Firebase (Auth + Firestore), supporting structured learning modules, mentor booking, and tiered payment/free access flows. Integrated LLM APIs to power an AI quiz generation engine, producing contextual assessments from course content — enhancing learner engagement with adaptive, auto-graded quizzes. Developed a voice-enabled AI chatbot for learner support, combining speech recognition APIs with LLM response generation for a conversational in-platform experience.
- Researched and proposed AI-driven recommendation and analytics features aimed at improving sustainable product discovery, enhancing user engagement, and enabling smarter decision-making through personalized platform experiences. Deployed on Vercel with environment-based config management; optimized for SEO, Core Web Vitals, and cross-device responsiveness.

GreenCycleHub – Sustainable E-Commerce Platform *Django | Python | MySQL | Razorpay | REST API*

- Built a Django-based e-commerce platform implementing a reward-coin system for plastic waste exchange, featuring cart management, order lifecycle tracking, and dynamic pricing logic. Implemented Role-Based Access Control (RBAC) with distinct admin and user roles; engineered an admin dashboard for real-time product, user, and order management.
- Integrated Razorpay payment gateway for secure transactions; designed reusable Django components and a normalized MySQL schema to support platform scalability.

TECHNICAL SKILLS

Languages : Python, JavaScript, TypeScript, C++
Frontend : React.js, Next.js, Tailwind CSS, HTML5, CSS3, AG Grid Enterprise
Backend : Django, FastAPI, REST APIs, Node.js
Testing : Playwright, Jest, Unit Testing, Test Automation
AI / LLM : Amazon Bedrock, Anthropic, LLM API Integration
Databases : Firebase (Firestore), MySQL
Tools & DevOps: Git, GitHub, Vercel, Render, CI/CD workflows, Jira (Agile/Scrum), Figma, Google Analytics.

EDUCATION

B.Tech – Computer Science & Engineering | Vignan's Institute of Information Technology *2022 – 2026*
CGPA: 9.25 / 10.0 | Visakhapatnam, India

CERTIFICATIONS & ACHIEVEMENTS

- Django Application Development with SQL & Databases – **IBM**
- React JS Professional Certification – **Infosys Springboard**
- Agile with Atlassian Jira – **Coursera (Atlassian)**
- Deloitte Job Simulation – **Data Analytics**
- Solved **300+ LeetCode** problems; **5-star C++** on HackerRank
- PRAGATI: Path to Future (Cohort 2) – **Infosys Springboard**
- UNSTOP Talent Park 2025 Up-skilling Program
